

BUTLER GOLD PRO

F E E D P U S H E R

BUTLER GOLD PRO IS WORTH IT

- ✓ Increases basic ration intake
- ✓ Improves feed efficiency
- ✓ Intelligent and continuous feed organisation
- ✓ Enhances the animals' well-being
- ✓ Loose, well-mixed feed
- ✓ Increases the milk yield of your herd, so even low-ranking cows consistently produce more milk
- ✓ More flexibility in the cowshed, saves more time
- ✓ More activity at the milking robot
- ✓ Good feed availability around the clock
- ✓ Excellent profitability

UP TO 70%

TIME SAVED BECAUSE LESS WORK IS NEEDED

BUTLER GOLD PRO

F E E D P U S H E R

Application	Intelligent and continuous feed pushing depending on the amount of feed, up to 99 passes per day
Dimensions	2000 x 1100 x 850 mm
Weight	750 kg
Travelling speed	up to 13 m/min
Navigation	Magnets embedded in the floor at 2-metre intervals Magnet diameter 5 mm also possible on feed trough bridges
Battery operated	2 x 105 Ah, maintenance-free gel cycle batteries, (travel distance: up to 600 m per pass) Optional 2 x 160 Ah batteries for long distances (travel distance: up to 1200 m per pass)
Charger terminal	Drive-in intelligent charging station for consumption-optimised charging cycles, connected load 16 A, 220 volts
Gradient	up to 10%
Options	Concentrate container - 120 litres with one component - 2 x 60 litres with 2 components - Liquid metering - Brush for pusher auger - Automatic filling control - Flashing light with acoustic signal available
Power consumption	approx. < 4 kWh / day (with 100 cows, 14 passes and loose feed)

BUTLER GOLD PRO

F E E D P U S H E R

ONE BUTLER GOLD PRO SERVES ALL LIVESTOCK SHEDS

The Butler Gold Pro pushes the feed gently onto the feed trough, without applying pressure. Thanks to its special patented auger, the freshness and quality of the feed are maintained and it motivates the animals to eat the feed.

- ✓ Freely configurable start-up times & intervals matched to feed quantity and feeding time
- ✓ Especially for feeding barrier configurations, counteracts dominant feeding behaviour
- ✓ Feed enhancer can also be added to the feed
- ✓ One unit can be used in several sheds
- ✓ Can be operated using display on the unit as well as from your PC, mobile phone or tablet
- ✓ Easy installation of magnets along feed trough and travel routes
- ✓ Can also traverse crossings and bridges as well as stainless steel troughs
- ✓ Minimum electricity costs
- ✓ Loosens and mixes feed thanks to patented pusher auger
- ✓ Cleaning blade ensures hardly any fine particles are left behind (depending on floor quality)
- ✓ Includes gate / door control

Feed enhancer hopper

with one or two dosing augers and a hopper turntable, automatic filling directly from the additives silo

Multi touch display

10" touch display with WiFi internet connection for remote maintenance and operation

Operation

Access from PC, tablet and mobile phone worldwide

Charger terminal

Intelligent charging terminal for on-demand recharging, can be driven over up by vehicles weighing up to 5 tonnes

Patented pusher auger

(featuring a lip on the auger blade)
Special wear-resistant & acid-resistant material, auger for mixing and loosening of the feed reduces feed residues

Safety systems

Safety switch and flap to detect obstacles, switches off automatically

Light beacon

Beacon with visual & audible warning signals is available as an option on the Butler Gold Pro

Stainless steel cover

For rations with a high maize content, as used at fattening farms, we recommend the extended stainless steel cover

Remote maintenance

Evaluation and remote diagnostics as well as automatic software updates
